## FORD BRAKES ARE UNUSUALLY EFFECTIVE

Reliability and safety due to simple design and careful construction

ONE OF the first things you will notice when you drive the Ford is the quick, effective action of its four-wheel brakes.

They are unusually safe and reliable because they are mechanical, internal expanding, with all braking surfaces fully enclosed. This prevents mud, water, sand, etc., from getting between the band and drum and interfering with brake action.

Other outstanding features of the Ford are the Triplex shatter-proof glass windshield, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, torque-tube drive, more than twenty ball and roller bearings, Rustless Steel, reliability, economy, and long life.

You save when you buy the Ford and you save every mile you drive.
